ChemEx Eurasia; The Meeting Point of Chemistry

With its new name and renewed format, **ChemEx Eurasia** continues its journey as one of the most respected and prestigious events in the industry, bringing together leaders, innovative brands, and professionals of the chemical sector under one roof..

Taking place on **November 03-05, 2027**, this prestigious exhibition will host a broad spectrum of participants, including chemical raw material manufacturers and suppliers, laboratory and analytical technologies, process technologies and solutions, as well as packaging, storage, and supply chain solutions.

Take your place at **ChemEx Eurasia 2027** to shape the future of the industry, establish new business connections, and discover the latest innovations in the chemical sector.

Why Should You Participate?

Provides direct access to decision-makers, suppliers, manufacturers, and investors in the global market.

Brings together all components shaping the chemical industry with professionals from across the globe.

Take your place among those shaping the industry with next-generation technologies and environmentally responsible solutions.

Offers the opportunity to increase export volumes through a strong global visitor network.

Chemical Industry in Türkiye Regional Power, Global Vision

The Turkish chemical industry has been experiencing rapid, sustainable, and high value-added growth in recent years, driven by economic expansion, developments in industrial infrastructure, and increasing R&D investments. With a broad product portfolio including petrochemicals, plastics and rubber products, paints, pharmaceuticals, fertilizers, cleaning products, cosmetics, and specialty chemicals, the sector stands as a cornerstone of Türkiye's industry, providing integrated solutions to automotive, construction, agriculture, textiles, healthcare, energy, and defense industries, and significantly contributing to the growth of the manufacturing sector.

Thanks to its strong production capacity, advanced technological infrastructure, and strategic geographical location, Türkiye serves as a reliable supply hub with close access to the markets of Europe, the Middle East, the Balkans, North Africa, and Asia.

The chemical sector is among Türkiye's leading export industries, closing 2025 with exports totaling USD 31.9 billion and setting an export target of USD 35 billion for 2026. In 2025, plastics and plastic products became the leading export sub-sector with USD 9.6 billion, followed by mineral fuels and products with USD 7.1 billion, and inorganic chemicals with USD 3.7 billion. Essential oils, cosmetics, and soaps achieved exports of USD 2.3 billion, while pharmaceutical products reached USD 1.8 billion.

ChemEx Eurasia 2027 brings together manufacturers, suppliers, technology providers, and investors from all sub-sectors of the chemical industry, making a significant contribution to the establishment of new business partnerships, the expansion of trade volume, and the further strengthening of the global competitiveness of the Turkish chemical industry.

Exhibitor Profile

Chemical Products

- Raw Materials
- General Chemicals
- Commodity Products
- Basic Chemicals
- Specialty and Specific Chemicals
- Petrochemicals
- Flame Retardants
- Antioxidants
- Flavors and Fragrances
- Wastewater Treatment Chemicals
- Binders
- Bioactive Substances
- Biocides
- Paints and Paint Intermediates
- Solvents
- Leather Chemicals
- Electroplating Chemicals
- Industrial Chemicals
- Energy and Petrochemicals
- Home and Personal Care Ingredients
- Inorganic Chemicals
- Paper Chemicals
- Catalysts
- Chemical Intermediates
- Organic Chemicals
- Specialty Additives
- Plasticizers
- Colorants
- Surfactants
- Stabilizers
- Agrochemicals
- Textile Chemicals and Dyes
- Construction Chemicals & Raw Materials
- Green Chemicals
- Surface-Active Agents
- Other Products

Laboratory and Analytical Technologies

- Analytical Equipment
- Spectroscopy and Chromatography
- Chemical and Gas Analysis Instruments
- Biotechnology and Genomics Instruments
- Environmental and Life Sciences Testing
- Laboratory Equipment
- Automation and Robotics
- Laboratory Analytics and Integration
- Laboratory Furniture and Infrastructure

Process Technologies and Solutions

- Fluid Handling Systems
- Thermal and Heat Transfer Systems
- Mechanical Process Systems
- Reactors and Bioprocessing
- Process Safety and Containment
- Environmental Control Systems
- Pharmaceutical and Biotechnology Manufacturing
- Machinery
- Modular Process Systems
- Plant Equipment
- Quality and Process Control Equipment
- Other Equipment

Packaging, Storage, and Supply Chain Solutions

- Packaging and Packing
- Filling and Labeling Equipment
- Dry and Bulk Material Handling
- Hazardous and Compliant Packaging
- Automated Storage and Retrieval
- Smart Inventory and Line Integration
- Sustainable and Reusable Solutions

Services

- Research and Development
- Regulatory and REACH Services
- Software and Hardware
- Analytical Services
- Digital Services
- Innovation and Sustainability Services
- Demonstration and Scale-Up Systems
- Start-up Projects
- Other Services

Visitor Profile

- Intermediate Chemicals Manufacturers
- Paints and Coatings
- Electrical and Electronics
- Household and Industrial Cleaning Products
- Contract Chemical Manufacturers
- Food and Beverage
- Pharmaceuticals and Biotechnology
- Pulp and Paper
- Chemicals and Petrochemicals
- Cosmetics and Personal Care
- Mining and Mineral Processing
- Plastics and Polymers
- Colorants and Dyes
- Reprography / Printing Products
- Ceramics, Glass, and Enamel
- Water and Environment
- Agrochemicals and Fertilizers
- Flavors and Fragrances
- Textiles and Leather
- Adhesives and Sealants
- Green Chemistry
